

CURRENT OPPORTUNITY

Title: **DevOps Engineer**

Department: **Product Development**

Employment Type: **Full-time**

Location: **Edmonton , AB**

Join a dynamic team, focussed on helping Municipal Governments build great communities.

We are a technology and service company, that is driven to help build a better Municipality. Our software offering is led by our flagship GIS product, which provides integrated viewing and control capabilities to a Municipality, while our services help our clients manage their data.

We are a small but growing (+30% year-over-year), team that is well positioned for growth in a niche market, and we are looking for A-player team members who can help take us to the next level.

Position Overview.

- Design and build advanced cloud architectures.
- Help development team to automate test environments.
- Implement and maintain continuous deployment of applications.
- Optimize infrastructure for security, scale, availability, and performance.
- Continuously evolve cloud infrastructure with modern patterns.
- Manage MuniSight's physical infrastructure.

Position Requirements.

- Intermediate knowledge of LDAP/AD.
- Experience with virtualization: ESXi, AWS, Azure.
- Linux & Windows experience.
- Strong understanding of microservice architecture and designs.
- Strong ability to collaborate in a team.
- Strong ability to set goals, and achieve those goals.
- Strong ability and willingness to learn.
- Strong ability to adapt and wear multiple DevOps and IT related hats.

About MuniSight.

MuniSight is a growing software business in the Edmonton region that is dedicated to helping Municipal Governments be successful. We offer competitive compensation, full paid vacation, and comprehensive health & dental benefits.

Our company is growing, so our team members are continuously challenged at the highest level. Our Company strives to be an example of a successful high-growth software technology company in Alberta, and our team members depend on each other to make it happen.
